# Helvenfurer\_

Everyone needs their own space.

Ours just happens

to be more generous

than most.

## When you offer a slideout this successful, expansion takes on a whole new meaning.

In 1996 when we introduced our Adventurer slideouts, we never guessed they would become our best seller in less than a year. So naturally, we expanded this year's

line to include even more features and improvements. The way we see it, when you buy a Class A motor home, you should get more for your money than a few extra square feet.

35WQ. Choose from a variety of slideouts, including this widebody model, never before offered by Winnebago Industries.

Space and beyond. Adventurer models range in length from 30 to 37 feet. Six of them are widebodies and five have slideouts. But more important than space, the Adventurer is full of big ideas. Take our slideouts, for example. We build room extensions so solid, they come with an exclusive three-year extended warranty. They're constructed on-site with special aluminum extrusions, which give

units additional strength. So all our widebodies feel solid and easy to handle (and hold their trade-in value), even after many miles.

Big ideas come in all sizes. This year

every Adventurer model has more space to offer. The 35WQ has a wider entrance door, the 37RW has a larger bath area and bedroom windows and bathroom skylights are larger on

all models. A larger microwave oven is standard equipment as well. And some models have new space-saving ideas, like a dinette table with self-storing leaf and a redesigned roll-out pantry.

When it comes to buying any motor home, it's the size of the ideas that go into it that count. So choose from our selection of roomy 1997 Adventurer models and see why they're widely successful.

## We're spotlighting some of the details that set us apart.

As part of our ongoing improvement policy, we put our motor homes in a dark room, turn on only the interior lights and check the effectiveness of each for reading, cooking, watching TV, etc. Using what we learn, we add and reposition lighting where possible.

Opticlear lenses were installed on the lights under cabinets to shed more light where you read and work.

Courtesy lights with conveniently placed wall switches softly light the way when you're up and around in the dark.

34DQ. This spacious slideout room is complemented by the upscale, contemporary look of our new White Granite cabinetry.

34WK. An overhead entertainment center adds to the luxury of this model. The cockpit features restyled driver and front passenger seats along with a smartly redesigned beverage tray.

35WQ. This efficient L-shaped galley comes with a 3-burner range, 1.3 cubic foot microwave and an available side-by-side refrigerator.

34RQ. The redesigned rollout pantry has a locking slide system and adjustable shelves.

34RQ. The exterior vertical compartment includes passthrough storage that makes loading and unloading bulky items easier.

34WK. This storage compartment is one of two located in the trunk area. The second compartment, accessible from inside the unit, utilizes space under the bed.

37RW. The larger bathroom comes with a glass shower door and additional lighting.

37RW. An available washer/dryer makes cleaning clothes a snap.

A larger bath area skylight offers more headroom than ever before. It also makes the best use of natural light, which is part of our overall lighting enhancement plan.

A water pump switch conveniently located in the bathroom is a good example of small things that make a big difference.

Seamless holding tanks are made in our own rotocast facility. We fit them to specific spaces in the frame to improve balance and handling.

Our three-point seat belts connect directly to the seat frame in the cab and are bolted to the steel cab substructure. Always use your seat belt.

A third exterior brakelight is a safety feature most manufacturers only put on high-end models. We have one on all our motor homes.

Select appliances are secured with steel tie-downs, an exclusive Winnebago Industries safety feature. It's not something we're required to do. It just makes sense.

## Some of its most impressive features are things

This unit's stylish exterior is accented by its new bright white body color.

Restyled driver's and front passenger's seats provide more comfort and support.

A satellite TV system is available, with or without a receiver, and all units are system ready (receiver not available in Canada).

A 24-ounce accumulator tank eliminates pump start and stop when small amounts of water are needed.

Our smooth, one-piece fiberglass skin is strong, easy to clean and free of exposed fasteners.

Not only will you find three-point shoulder and lap seat belts with retractors in the cab, lap seat belts are standard in selected areas of the coach as well.

New interior lighting enhancements include opticlear lenses on lights beneath upper cabinets plus courtesy lights along the floor.

Steel tie-downs that secure appliances are just one of our many safety features.

An automatic shoreline generator changeover switch is standard.

> We manufacture our own molded rear wheel wells which are non-corrosive and absorb sound better than metal.

A computer evaluates every unit for wheel alignment and checks 75 chassis points to ensure proper handling.

A water test is conducted at the

end of the assembly line to make

sure each unit is watertight.

Computer simulated or physical drop testing, performed on various models, is unique to Winnebago Industries. This testing aids in evaluating structural integrity, panels/panel joints, appliance attachments and window/door operations.

> We letter code our wiring every 3" to make service diagnosis easier and faster.

An Onan® Quiet Diesel generator is available on the 34WK pusher.

We conduct a final inspection of each unit to check all the dash functions, as well as the overall fit and finish.

WINNEBAGO

New rubber matting and a non-slip tread strip at the entrance step make getting in and out easier.

Note: Slideout room sizes vary by model.

### you'll never see.

manufactured room extensions.

Why do people buy our motor homes? Is it our warranty? Our nationwide dealer network? Or is it those WIT Club caravans? Socializing is an important part of motorhoming. And we don't know a more fun bunch of people than our Winnebago-Itasca Travelers (WIT) Club.

There are more than 250 chapters across the U.S.A. and Canada. Many members enjoy attending rallies and traveling together in caravans. A highlight of every summer is the Grand National Rally when thousands of members meet at our campground in Forest City.

In addition to social activities, WIT Club members enjoy many special benefits like professional trip planning, mail forwarding and discounts.

## How well are our motor homes put together? Ask

Since we come from a small town, we've always believed in the direct approach. When

you want to find out something, go right to the source. And when you want to find out about a motor home, who better to ask than someone who works on them day in and day out?

#### Ask the service manager.

The service manager at your Winnebago Industries dealer has worked on a lot of different types of motor homes and is a wellspring of information. He'll

be glad to share with you which motor homes are built the best. Which ones do service technicians find easiest to work on? (Remember, less labor means lower labor costs.) Which company has the most comprehensive warranty? And which motor homes would he recommend to a friend? We're confident Winnebago Industries is the name you'll hear most often.

**Service training.** Customers tell us the quality of dealer service has a big influence

on the owner's overall satisfaction with their motor home.

To help keep that quality high, we conduct an ambitious training program in the field and at our Forest City plant. Throughout the year you'll find service technicians from all over the country attending week-long training sessions on such topics as 110-volt generator service, body repair and appliance service.

"The best hands-on training I've seen."

—Service Technician Jim Bithell, Russ
Dean's Family RV Center, Pasco, WA.

Parts availability. Of course, even an ace service technician's hands are tied if the parts he needs aren't available. So we've created an extensive warehousing and distribution system that carries parts for older models, too. According to our Parts Computer Network, 99.3% of our normal stock items are available whenever a dealer calls.

## someone who takes them apart.

Warranty protection. We've always felt the best service policy is to keep the need for service to a minimum. That's why we build our motor homes better. And because we go the extra mile during manufacturing, we can back our motor homes with the strongest warranty in the industry. You could say our warranty starts where most others leave off. Because in addition to basic 12-month/15,000-mile coverage, we also have a 36-month/36,000-mile limited

warranty on lamination. And our standard 10-year limited parts and labor warranty on the roof is exclusive in the industry.

After the first year, membership in the Preferred Care Unlike most manufacturers, Program can be extended by we also cover the appliances and joining the WIT Club. equipment we install, so you can count on the convenience of one-stop service for warranty repairs. Expert service people are ready to help you at our many authorized dealers through-

out the U.S. and Canada.

Preferred Care Program. Every new Winnebago Industries motor home comes with a one-year membership in our Preferred Care Program. This newly enhanced 24-hour nationwide assistance plan covers emergency dispatching for road service and towing, equipment service questions, service provider recommendations, service appointments and directions to service locations. Other free services include jump-starts, tire changing, fuel delivery and lockout assistance. A special

Length	37'6'
Exterior Width	8'
Interior Width	7'7"
Interior Height	6'8"

Our own Stitchcraft Division makes the seats, cushions, draperies and bedspreads that give our interiors a custom-designed look and feel.

The cabinet shop is responsible for cabinetry, doors and countertops. They use time-tested traditional methods like panel and rail construction.

A double rub test, which simulates getting in and out of a seat up to 30,000 times, is used to make sure our upholstery fabrics will stand up to years of wear.

## It's little things that make your motor home feel

Botanical with Waterford Oak

North Shore with Waterford Oak

Zephyr with Waterford Oak

Oakleaf with White Granite

#### like home.

Easton with White Granite

Other than bringing along your favorite knickknacks, how can you make a motor home actually feel like home? We start by considering dozens of details that add up to a concept we call Home Comfort Design.

By making most of our own furniture and cabinetry, we can have greater control over the fit and finish. And for fabrics and carpeting, we specify only materials that surpass industry wear tests and are treated for stain resistance. Of course, you're welcome to add your own touches. We just want to provide surroundings you'll enjoy coming home to.

#### New lower body panel color options

Umbra Metallic

Super Blue Metallic

This year's exterior lower body panel colors are Umbra Metallic, standard with Botanical and Oakleaf interiors, and Super Blue Metallic, standard with North Shore, Zephyr and Easton interiors. However, you may order either exterior color, regardless of your interior choice.

Winnebago Industries has been designated a Qualified Vehicle Modifier by Ford Motor Company. The QVM program promotes high standards for manufacturers who build motor homes on Ford

chassis, and we are proud to be one of the first motor home manufacturers to qualify. Meeting QVM standards is a part of our policy of continuous quality improvement.

#### 35WQ

A slideout is available on this innovative widebody unit. The full 8' interior width provides room for larger amenities and flexible floorplans.

Adventurer offers a wealth of space-saving features: A slideout is standard on this unit, as well as generous wardrobe storage, a roomy bath and two inviting bedroom choices.

#### Winnebago Industries Commercial Vehicles

We build mobile clinics, police and fire command posts and many other hard-working vehicles. Units from 22 to 37 feet can be custom built for almost any application.

Where your

motor home comes

from is just as

important as

where it takes you.

Most manufacturers assemble motor homes in several locations. But ours are built

in just one place:
Forest City, Iowa.
To understand how
this helps us build
better motor homes,
you should know a
little of our history.
Winnebago Industries
began in Forest City
nearly 40 years ago.

Since that time, friends, neighbors and sometimes even two or three generations of the same family have worked side by side. We've always had a special incentive to pay attention to the details and keep quality

high. Because around here, building motor homes isn't just a job. It's a way of life.

To learn more about our motor homes, we invite you to see one of our outstanding dealers.

And to see how we

build motor homes, you're welcome to visit our headquarters. Call us at (515) 582-3535 for a free factory tour.
